ESG Approach

Fondita Sustainable Europe invests in attractively valued European companies that have a product or service which enables reaching lower CO₂ emissions and more efficient use of natural resources. In addition to the environmentally focused thematic approach the investment process includes both qualitative and quantitative sustainability factors. The objective is to have holdings with a positive impact on environmental issues via their product/service, as well as their operations. The fund excludes companies with exposure to sectors we perceive as unsustainable or unethical, as well as companies that have severe UN Global Compact breaches. If issues arise regarding ESG we engage through direct dialogue with management. If issues are not properly addressed, we divest the holding.

Disclaimer information

Current Environmental Certificates

The fund has 2 environmental certificates, the Nordic Swan Ecolabel and the Austrian Ecolabel. The fund needs to fulfil certain sustainability related requirements in the investment process, transparency and consequently the holdings, to maintain these certificates. The fund is audited annually, based on the requirements of the certificates.

SFDR-Classification

SFDR aims to increase transparency on how financial market participants integrate sustainability into their investment decisions and recommendations. It introduces a classification system with new disclosure requirements for investment products.

Dark Green (Article 9) – The fund has sustainability as their objective.

Light Green (Article 8) – The fund promotes environmental or social characteristics, or a combination.

Grey (Article 6) - Funds which do not integrate any kind of sustainability into the investment process.

MSCI ESG Rating

MSCI assesses thousands of datapoints across 35 ESG Key Issues, focusing on the intersection between a company's core business and the industry issues that can create significant risks and opportunities for the company. Companies are rated on a AAA-CCC scale relative to the standards and performance of their peers. Issue scores and weights combine to overall ESG rating. E, S and G scores are also calculated separately.

Company Case 1

Ørsted A/S, formerly Dong Energy A/S, is a Denmark-based energy company engaged in procuring, producing, distributing, and trading energy and related products in Northwestern Europe. The Company operates through three segments: Wind Power, engaged in the development, construction, and operations of wind farms; Bio-energy and Thermal Power, responsible for the generation of electricity and heat from thermal power stations; and Distribution and Customer Solutions, responsible for the purchase, sale and distribution of energy. The Company's competences are aimed at three core activities: development and construction of assets, operations and maintenance of assets, and sales and optimization of the energy commodities portfolio.
